  </body>
</html>
```

How are websites built?

Frontend Technologies

HTML5: HyperText Markup Language

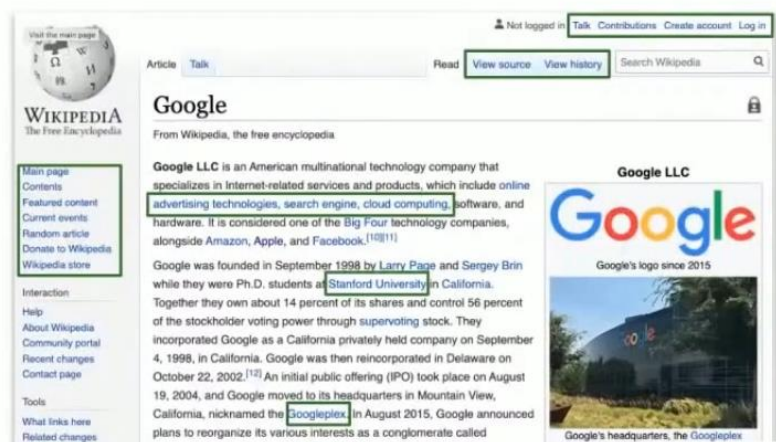

The content
that we see
is written
in **HTML**

Frontend

HyperText

HyperText
Text Containing **Links**
(Hyperlinks)

Meaning

Markup

The Remarks
That We Add to **Highlight**
The Importance of a Text in The Document
Which Helps in Better Understanding.

Frontend

Parsing & Rendering

Parsing

In the present context,
Understanding and Separating Out
the different components
in the document by the browser

Ex: Parsing in our daily language is related
to understanding and separating out
verbs and nouns in a sentence

Frontend

Parsing & Rendering

Rendering

After parsing the document,
the browser, with the help of Operating System,
Creates and Displays
what we are supposed to see on the screen

Frontend

CSS3: Cascading Style Sheets

CSS adds **style** to the websites.

Frontend

CSS3: Cascading Style Sheets

To achieve style,
the following are used

- Fonts
- Colors
- Size
- Shapes
- Positioning, etc.

Frontend

Javascript

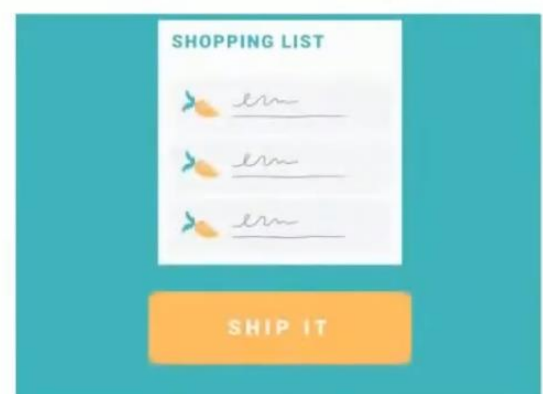

Can change
the contents of website
dynamically
without reloading
the entire site

Frontend

Javascript

Adds
interactive experiences
to the website

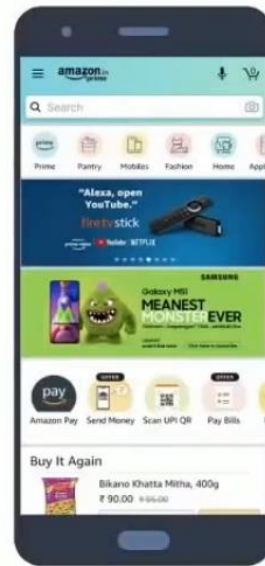

Mobile Apps
